Box 180, Jefferson City, MO 65102, (573) 751-4115 (voice) or 800-735-2966 (TTY), or to the U.S. Fish and Wildlife Service Division of Federal Assistance, 4401 N. Fairfax Drive, Mail Stop: MBSP-4020, Arlington, VA 22203.

Spring Creek Gap

CONSERVATION AREA

MISSOURI DEPARTMENT OF CONSERVATION

About this Area

Located 4 miles north of Vichy on Old Highway 63.

Spring Creek Gap Conservation Area is in Maries County, approximately 10 miles southeast of Vienna and 14 miles north of Rolla on old Highway 63. This 1,816-acre area was acquired in three parts, starting with the 1948 purchase of a 280-acre parcel known as the Vichy Towersite. The Conservation Department purchased an additional 1,495 acres in 1978 from Dr. A.W. Strickle and added a 40-acre tract in 1980.

Spring Creek Gap, with its combination of forests, woodlands, steep topography, dolomite glades and old fields, is an extremely scenic area, especially during the fall color change. The forest has a nice display of spring wildflowers in the ravines. Cedar Creek, an intermittent stream, bisects the area. In 1982, 40 acres on Spring Creek Gap Conservation Area was designated Natural Area and in 2007 the Natural Area was expanded to 692 acres and named Spring Creek Gap Glades Natural Area. Yellow coneflowers, silky asters and blazing stars are some of the colorful plants growing in the natural area. The majority of the forest is made up of oak and hickory in dry dolomite woodlands. White and black oak predominate on rich north and east slopes of the area, and post oak, chinquapin oak, blackjack oak, and eastern red cedar mark woodlands and glades. A planting of shortleaf pine may be seen along old Highway 63.

The area features numerous glades, ranging in size from less than one acre to over 10 acres. The natural openings, which occur on low quality soil, harbor remnant prairie plants and provide forage for wildlife.

Long term management efforts include opening up overgrown glades and woodlands which will increase the acreage of and diversity of prairie plants. During your visit to the area, you may view various natural resource management practices

designed to improve wildlife habitat, maintain watershed quality, restore natural communities, and enhance tree growth and species composition. Watch the areas that have been disturbed as they revegetate through the years. You will find some sites becoming more open with greater ground flora and some better timber quality developing. Wildlife habitat management practices include the creation of watering ponds; shallow water developments which will provide habitat for reptiles and amphibians and woodland thinning followed by prescribed burning to open up the woodland canopy.

Recreational Opportunities

Bird Watching – Hiking – Hunting- Outdoor Photography – Wildlife Viewing – Camping

Rules and Regulations

Open for public use from 4:00 a.m. to 10:00 p.m.; hunting, fishing, trapping, camping, dog training, launching, and landing boats allowed 24 hours a day on areas where these activities are permitted.

- Pets and hunting dogs are permitted but must be on a leash or confined at all time. Hunting dogs may be used off the leash and unconfined for

hunting and training purposes. Hunting permit required to train dogs in pursuit of wildlife.

- Nuts, berries, fruits, edible wild greens and mushrooms may be taken only for personal consumption. On natural areas, taking wild greens is prohibited.
- Vehicles are only permitted on public roadways and in parking lots.
- No horseback or bicycle riding opportunities except on public roadways.
- Target shooting not allowed.
- Camping is allowed anytime in designated camping areas. These may or may not have defined campsites. Seasonal closures and restrictions may apply. Walk-in/backpack camping is allowed. No amenities are provided.
